

Diagnostic kit of virus and virus-like pathogens of Apple

Highly sensitive primer based detection kit has been developed for five major apple virus and virus-like pathogens. The kit is useful for (1) testing of nursery plants and for (2) testing these pathogens at the quarantine level.

Multiplex RT-PCR

DAS-ELISA

Suitable for testing *Apple chlorotic leaf spot virus*, *Apple stem grooving virus*, *Apple stem pitting virus*, *Apple mosaic virus* and *Apple scar skin viroid*

Deformed and diseased apples

Results obtained by multiplex RT-PCR kit
